

\$40,000 per person, not increase it to \$60,000 per person. Yet we're being accused of trying to completely dismantle the family farm by not increasing the subsidies that are being paid out right now. We're simply saying they should remain where they are in current law.

So despite all the talk about stable food prices for citizens of the United States, or whatever else, remember, this motion to instruct has nothing to do with that. This simply has to do with a program that gives direct payments to people who, in many cases, do not farm at all, that has no tie to crop prices, whether they're high or whether they're low.

Let me simply say also that the administration said this week, this plan would result, talking about the current iteration of the farm bill, this plan would result in the continuation of farm subsidy payments to individuals with extremely high incomes.

The administration also said, this is not reform, and does not move Congress closer to a farm bill that the President would sign.

I certainly hope that the President sticks with that commitment. We need a farm bill that honors our commitment to have some fiscal responsibility here. Upping the limit of direct payments, increasing it by 50 percent, is not fiscally responsible.

So I would encourage my colleagues to join us in voting for this motion to instruct. Discount the debate that doesn't have anything to do with this debate on whether or not the conferees should accept the current subsidies or increase them.

With that, I thank the gentleman from Wisconsin for his words and for all those who have participated. I would encourage a vote in favor of the motion to instruct.

I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to instruct.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to instruct offered by the gentleman from Arizona (Mr. FLAKE).

The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

Mr. FLAKE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The postponed vote on the motion to suspend the rules with regard to House Concurrent Resolution 308 will be taken tomorrow.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

SYRIA AND NORTH KOREA CONSPIRE TO BUILD NUCLEAR WEAPONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE. Mr. Speaker, North Korea and Syria were working together with Pakistan rogue scientist Abdul Khan to build a nuclear reactor in Syria, capable of producing plutonium for two nuclear weapons within a year of when it was destroyed by Israeli jets in September of 2007.

Israel, by the way, has not confirmed or denied the air strikes. But Israel acted in self-defense and self-interest because of the fact that Israel is so close to Syria.

Mr. Speaker, here is a map of the area. We have Syria and, of course, we have Israel and Iraq and then, of course, Iran on the other side. And here is the location in Eastern Syria where the nuclear facility was being built, with the aid of the North Koreans. From that location, in Alkibar facility, it is only 450 miles to Tel Aviv, where the majority of the Israelis live.

□ 2015

This whole area, of course, is in somewhat of a turmoil because of the fact you have Syria and the rogue dictator in Iran working together with the North Koreans to facilitate the development of nuclear weapons for all three countries.

The CIA has reported recently that North Korea is building Syria a reactor similar to the one that they have in North Korea. And North Korea then helped the Syrians cover up the results of the bombing after the reactor was destroyed.

Here are four photographs that the CIA has released and declassified just this week. Over on the top corner here is a photograph of North Korea's nuclear reactor that is capable of producing plutonium. You will see right next to it Syria's nuclear reactor as it was being built. It was built with the same floor plan, the same design as the North Korean facility that is in North Korea. This photograph was taken of Syria's reactor shortly before it was blown up.

Here is an aerial photograph of Syria's reactor, and you can see, Mr. Speaker, it's camouflaged to the extent that it looks just like a boxed building just in the eastern part of Syria with nothing anywhere close to it. And after Israeli jets came in and bombed the facility, this photograph on the bottom corner shows the results of the Syrian reactor after it was bombed by the Israeli jets.

And what is interesting, after the Israeli jets came in and bombed this facility, the North Koreans and the Syrians started working together very quickly to destroy what was left of this facility and bury it in the desert and then put in its place another facility, a building that looks just like this one but obviously, based on intelligence, is just a shell and not really used for any purpose whatsoever.

The purpose, of course, to build the second building was to let the world know that they didn't have anything in this area, but of course, we know that they buried all of their equipment and all of their nuclear devices or equipment, I should say, in the desert underneath the bombing that was done by the Israeli pilots.

So it's important for us to be aware of the contact and the working of North Korea with Syria. It is not a recent development. North Korea started working with Syria to build this facility in 2001, and they have continued to work with them until they started actually building this facility that would be capable of producing plutonium and at least to be able to build two nuclear weapons within a year.

North Korea is a nuclear threat and appears to help any nation with evil intentions, and the whole world needs to know about it. The countries of Iran, North Korea, and now Syria need to be known to all the world that they are nations with hearts that are fatally built on mischief and with malice aforethought. They build nuclear facilities with no redeemable, peaceful intentions. The normal, peaceful countries of our planet, especially those in the Middle East, cannot allow these three nations to have nuclear nonsense continue. They are on a path of destruction for at least somebody else, other than themselves, if their intentions are not stopped.

As for the nameless Israeli bomber pilots who flew these missions to destroy this nuclear facility capable of later being able to build nuclear weapons, they are thanked for their job well done, and the world needs to be aware that North Korea, Syria, and Iran seem to continue to work together to thwart world peace by building facilities that are capable of destruction for other countries, especially their neighbors.

And that's just the way it is.

BRING OUR TROOPS HOME AND HELP IRAQ HEAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, today I joined Representatives MAXINE WATERS, BARBARA LEE, and ALCEE HASTINGS in hosting a remarkable photo exhibit reception focusing on the appalling refugee situation resulting from the occupation of Iraq.

Renowned photographer, Gabriela Bulisova, traveled to Syria to document the plight of the millions of
